URDANETA CITY, PANGASINAN

EDUCATION

BS INFORMATION TECHNOLOGY

UNIVERSITY OF EASTERN

PANGASINAN - 2026

BINALONAN, PANGASINAN

TECHNICAL SKILLS

- WEB AND MOBILE DEVELOPMENT
- FRONTEND AND BACKEND FRAMEWORKS (NEXT.JS, LARAVEL, NODE.JS)
- PROGRAMMING LANGUAGES (JAVASCRIPT, PHP, HTML, CSS)
- DATABASE MANAGEMENT (MYSQL, MONGODB, FIREBASE)
- DATA MIGRATION
- VERSION CONTROL AND COLLABORATION (GIT AND GITHUB)
- SYSTEMS AND ENVIRONMENT SUPPORT (NETWORK CONFIGURATION, ENVIRONMENT SETUP)
- APPLICATION TESTING AND ISSUE RESOLUTION

SOFT SKILLS

- ATTENTION TO DETAIL
- WILLINGNESS TO LEARN AND GROW
- STRONG COMMUNICATION SKILLS
- COLLABORATION WITH CROSS-FUNCTIONAL TEAMS
- ANALYTICAL AND PROBLEM-SOLVING SKILLS
- TIME MANAGEMENT AND PRIORITIZATION
- CRITICAL THINKING
- RESPONSIBILITY AND ACCOUNTABILITY

CERTIFICATIONS:

- CERTIFIED AI AMPLIFIED SCHOLAR - PHILIPPINE CODING CAMP/INNOVISION 2026
- 500-HOUR OJT COMPLETION CERTIFICATE - MAKERSPACE INNOVHUB OPC

PROFILE

I am a fresh IT graduate with practical experience in software and web application development gained during my internship at MakerSpace InnovHub OPC. I have knowledge of both frontend and backend web development, with particular interest in backend logic, database management, and solving technical problems that keep an application running smoothly. During my internship, I contributed to real projects that involved building application features, managing databases, migrating data between systems, and testing applications before deployment. I am comfortable learning new tools quickly and enjoy working closely with a team to figure out the best way to get things done.

WORK EXPERIENCE

Developer Intern

MakerSpace InnovHub OPC

February 2026 – May 2026

Software and Web Application Development

- Assisted in developing and maintaining web applications using Next.js and Node.js.
- Implemented application features and resolved issues for real-world projects, including a research platform and an enterprise analytics dashboard.

Testing and Troubleshooting

- Participated in testing, debugging, and improving application performance ahead of deployment.
- Identified and resolved bugs and technical issues throughout the development process.

Environment Setup and Documentation

- Installed, configured, and maintained development and testing environments and software tools.
- Supported documentation and technical implementation for ongoing development work.

Team Collaboration

- Collaborated with team members using Git and GitHub for version control and code collaboration.
- Participated in team discussions and check-ins to stay aligned on project updates and deliverables.
